Technical Support

Please contact our technical support through your local sales representative info@solbi-mural.com.

Adhesive tapes and other industrial products are used to solve various problems in different fields of application. Each product has been developed for a specific application group. However, experience shows that even in similar applications, the requirements may change from case to case. We therefore recommend that you carry out tests to ensure that the product to be used is suitable for your application. Our technical department will provide you with all recommendations based on the knowledge we have gained from our experience, but without obligation.
