Flexographic Plate Mounting Tape - Oraflex® Print 10

Product Description

Flexographic plate mounting tape with high dimensional stability.

Properties

- Double-sided filmic tape
- High dimensional stability
- Natural rubber adhesive (closed side & open side)
- Creped PP film liner
- Firm PET carrier with high thickness accuracy
- High tack natural rubber adhesive for a secure bond between plate and cylinder
- Clean and easy removal
- Creped PP liner enables mounting without air bubbles

Technical Characteristics

Thickness without liner	0,1 mm
Liner	0,08 mm
Adhesive	Natural rubber
Carrier	PET film transparent
180° peel* [N/25 mm], FINAT TM 1, 20 min. dwell time	8
90° peel* [N/25 mm], FINAT TM 2, 20 min. dwell time	7
Dynamic shear	180 N/625 mm ²
Temperature resistance	60° C

Applications

- Photopolymer or rubber plate mounting on mounting films.
- Sleeves or print cylinders for flexography.
- Letterpress.
- Label printing.

Storage and expiration

Keeping the material in the original packaging and at a stable temperature of 21 °C with a relative humidity of 50% the product has a longevity of 12 months.

Recommendations

Check that the surfaces are dry, clean and free of fats, oils or other substances.

Technical Support

Contact our technical support via your local sales representative info@solbi-mural.com

Adhesive tapes and other industrial products are used to solve various problems in different fields of application. Each product has been developed for a specific application group. However, experience shows that even in similar applications, the requirements may change from case to case. We therefore recommend that you carry out tests to ensure that the product to be used is suitable for your application. Our technical department will provide you with all recommendations based on the knowledge we have gained from our experience, but without obligation.
