

Adhesive Tapes

GENERAL CATALOG

REFLECTIVE TAPES

- Reflective for vehicles: trucks, cranes and emergencies.
- Reflective for highway signage
- Reflective/non-slip for road marking.
- Textile for making work clothes
- Flexible for manufacturing pivots and plastic beacons.

ADHESIVES / PRIMERS

- 3M Adhesives, Cleaners and Primers
- TESA Adhesives and Cleaners

DOUBLE SIDED ADHESIVE TAPES

- Double Sided Adhesive Tapes
- Double-sided Transfer Tape
- VHB tapes
- Graphic Arts Tapes
- Special tapes for Electricity and Electronics

ADHESIVE TAPES ONE SIDE

- Single Sided Adhesive Tapes
- Security / Signaling
- Antidust tapes
- Copper Tapes
- Greenhouse tapes
- Protection and Coating Tapes
- Tapes and Air Conditioning Products
- Seals - Strapping
- Film - Die-cut - Manipulated

SPECIALTIES

- Apparatus and Dispensers
- Adhesive handles
- ZIP bags and Packing-List
- Products for asbestos removal
- Butyl Tapes
- Tapes for Artificial Grass
- VOID Labels and Seals
- GLUE POINTS Adhesive Drops
- HANG TABS Adhesive Blister Hangers
- BigBags and Safety Flanges
- TESA Specialties
- Polyurethane Adhesive Bumpers
- 3M Specialties
- Adhesive Foam Tapes and Adhesive Weatherstripping
- Laser Engraved Labels

TAPE WITH REPOSITIONABLE CLOSURE / VELCRO® / DUAL LOCK

- Repositionable Adhesive Closure
- Repositionable Closure For Sewing
- Repositionable Double Hook & Loop closure
- Repositionable Thermo-Adhesive Closure
- Repositionable Die Cut Closures
- 3M Dual Lock
- VELCRO® brand

WE ARE OFFICIAL DISTRIBUTORS

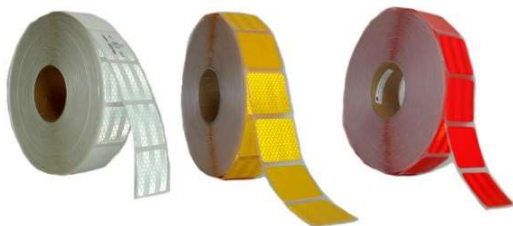

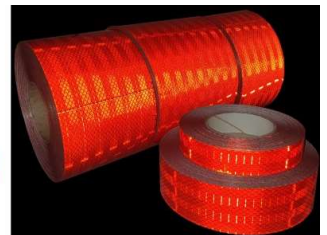

REFLECTIVE TAPES

Reflective tapes are designed to improve night visibility in many situations: vehicles, signs, boarding areas, etc.

We also have reflective adhesive tape, suitable for trucks, with ECE 104 approval, for V23 vehicles, suitable for circulation throughout the European Union

There are a variety of types and colors:

Reflective sheeting type "honeycomb" Level 2

Reflective sheets in smooth finish. Level 1

Segmented reflective tape

Reflective tape for tanks

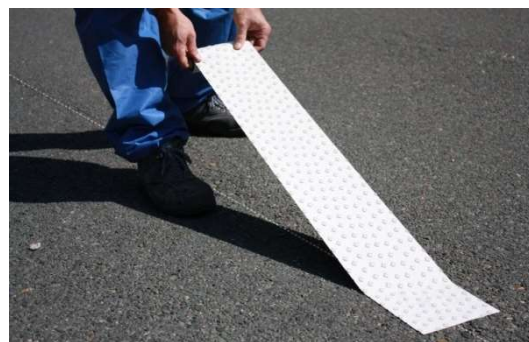

Adhesive tapes for special vehicles, cranes, gondolas, ambulances, police and firefighters.

STAMARK tapes for floors:

- Temporary or definitive tape
- Yellow or white colors.

ADHESIVES / PRIMERS

Adhesives are substances that can hold two or more bodies together by surface contact. They are also called glue, Industrial adhesives are those used in a multitude of manufacturing processes to make joints.

Primers are used to increase the surface energy of the adhesive and in this way, improve the bond between the adhesive of the tape and the support to which it is to adhere.

3M Adhesives, Cleaners and Primers

Structural Adhesives

STAMARK Tape Primer

Adhesive tape primers

Nitrile Adhesive

3M Adhesive Cleaner

3M Spray Adhesives

Adhesive Remover

DOUBLE SIDED ADHESIVE TAPES

They are tapes that adhere on both sides, very suitable for clean joints on all types of surfaces with specific characteristics for each application.

There are different peculiarities when choosing a double-sided tape:

- Materials to glue: plastic, metal, glass, wood, cardboard, paper.
- Duration: permanent, temporary, removable.
- It can be applied indoors, outdoors, humid areas, with resistance to high and low temperatures.
- Tape support: film, fabrics, transfer, foam and paper.
- Sectors: Industry in general and graphic arts, signage, glass industry, advertising, automotive.

Double Sided Adhesive Tapes

Double-sided Recovery Tape for Moldings

White, Black or Transparent

Double Side Transfer Tape

3M ATG 904 Transfer Tape

3M ATG 904 Tape Applicator

Transfer Tape in rolls

Sheet Transfer Tape

VHB Tapes

3M[™] VHB[™] Tapes are high-strength, double-sided acrylic foam tapes that allow you to quickly and easily create a durable bond that actually builds strength over time.

They have the ability to bond to a variety of materials, including aluminum, steel, glass, plastics, and painted and powder-coated surfaces.

Provide strong joining solutions in almost any material, eliminating distracting visible fasteners such as screws, bolts, rivets, and other mechanical anchors.

Available in a variety of sizes and colors, even in SHEETS format, as well as with different degrees of resistance.

Graphic Arts Tapes

Double-sided Tissue Tapes

Double-sided Transfer
Tapes and their applicators

Double-sided tape for
gluing of printed canvas

Double-sided Flexo Tape

Scotch tape
Magnetic - Magnetized

3M™ Single-Sided Electrically Conductive Tape 3304BC-S

3M™ VHB™ LVO Tape
Reduced VOC
(Volatile Organic Compounds)

SINGLE SIDE ADHESIVE TAPES

Tape is used to attach objects temporarily, or sometimes permanently. Single-sided tape contains an adhesive emulsion on only one side.

When choosing a single-sided tape we must take into account:

- Materials to glue: plastic, metal, glass, wood, cardboard, paper.
- Duration: permanent, temporary, removable.
- It can be applied indoors, outdoors, humid areas, with resistance to high and low temperatures.
- Tape support: film, fabrics, foam and paper.
- Sectors: Industry in general, agriculture, construction, packaging, air conditioning, etc.

Aluminized Splicing Tape

Conformable Aluminum Tape

105°C Fleece Adhesive Tape,
Black Fabric, for Taping Cables

Safety / Signage

Anti-slip Adhesive Tapes

Available in various sizes,
and with different types of
grip (general use, wet
areas, extreme traffic ...)

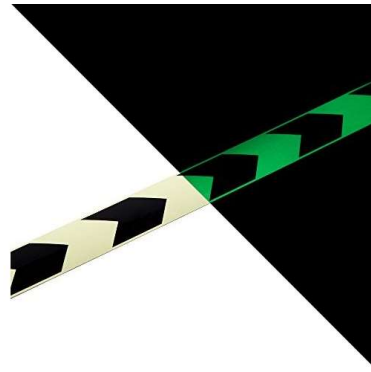

Colors: White, Black, Red, Orange, Blue, Green,
Transparent, Fluorescent Yellow, with Yellow / Black
Stripes, Photoluminescent, etc.

Photoluminescent Adhesive Tapes

With Smooth Design,
in Stripes or Arrows

Adhesive grip tape for handrails and stair railings, specially designed for use in public spaces, shopping malls, port and airport terminals, etc.

Floor Marking Tapes

In Solid and Striped Bicolor Colors

Perimeter Beacon Tapes

Standard tapes, in White / Red and Yellow / Black

Custom ribbons

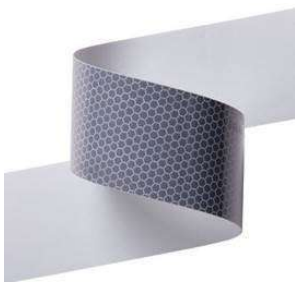

Ribbons for Town Halls, Civil Protection and Police

Reflective Textile and Sewable Tapes,
for the Manufacture of Safety Clothing.
Elevated Retro - Reflection

Reflective adhesive tape. With SOLAS (Safety of Life at Sea) approval.
For boats, vests, lifesavers, etc.

Black / Yellow
Speed Reducers

Anti-Impact Protective Foam for Parking
Columns and
Parking signage.
Available in Corner Pieces and Coils.

Antidust Tapes

The AntiDUST® breathing tape has been exclusively designed to seal the alveoli of the alveolar sheets used in cellular polycarbonate.

AntiDUST® tapes offer comprehensive protection against the most common problems that usually appear in roofing systems, such as the proliferation of algae and fungi, condensation, contamination by dust and insects, etc., which are the cause of the sheets polycarbonate are dirty in a matter of a few months.

We have standardized solutions, as well as special measures adapted to any type of plate.

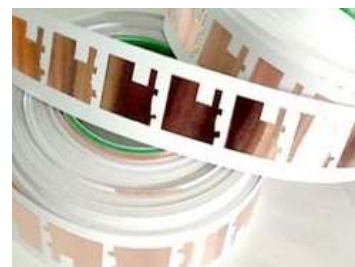

Copper Tapes

Copper Shielding Tapes
and with Conductive Adhesive

For a large number of applications: Electronics, Slot Car Tracks (Scalextric Type),
Decoration, Agriculture, (as a slug and snail repellent), etc.

Greenhouse Tapes

Polyethylene tape with modified acrylic adhesive, specially designed for the repair and assembly of greenhouses.

It offers excellent behavior against UVA rays and the elements.

Available in various sizes, and in white and transparent colors

Also in black, known as
Reservoir Repair Tape

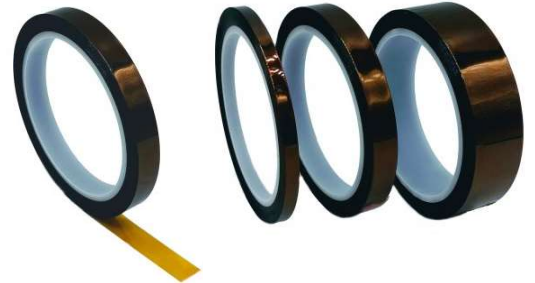

Heat-resistant Gray Polyethylene Tape, for
Thermal Insulation of Metallic Arches of
Greenhouses.

Protection and Coating Tapes

Self-Vulcanizable Insulating Tape
EPR Black

Polyamide Adhesive Tape
KAPTON

PET Polyester Adhesive Tape
For Coating

Polyester Adhesive Tape
PET Violet, For Anodizing

PUR Antifriction Adhesive Tape,
Protective and Anticorrosive
for Propellers and Racing Cars

Polyester Adhesive Tape
Green PET, With Rubber
Adhesive

PVC Adhesive Tape for Waterproof Sealing.
Special for Repairing Truck Tarps, Awnings, Tents, etc.

Roller Grip Tape, Rough and Smooth

Adhesive tapes for construction, special for Passive Houses or Passivehaus

Construction Polyethylene Adhesive Tape

It is a waterproofing tape against water, air, wind, steam and noise, achieving a hermetic seal at each interruption of the sheets in systems for roofs or walls.

Reinforced Kraft paper tape in yellow color

Indicated for the hermetic union between all types of membranes or vapor barriers inside.

Adhesive foams of different measures and sizes

For sealing gaps in placement of exterior carpentry, doors, windows, etc.

Tapes and Air Conditioning Products

Aluminum Adhesive Tapes

Available in different sizes and thicknesses

Also Black Color Aluminum for Neto Climaver type ducts

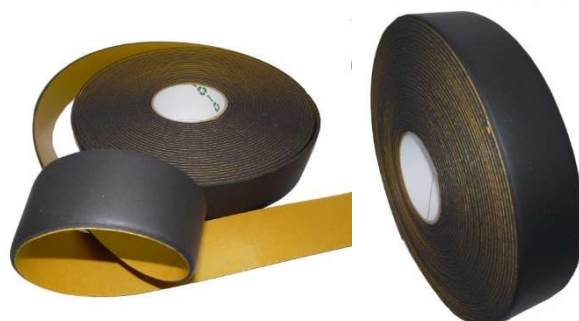

Aluminum Adhesive Tape Reinforced with Fiberglass

Woven Polypropylene Adhesive Tape
Neto Ribbon

Synthetic Rubber Foam Adhesive Tape,
Armaflex type

Staples for Staplers
GUNTACKER and ESCO

With Removable Adhesive,
For Closing Packages

Metered Paper Tape
For Measuring Textile Coils
With or Without Adhesive

SPECIALTIES

This section includes all those things that cannot be defined as "tapes" properly speaking, but in which we have become true specialists.

Apparatus and Dispensers

Thanks to the appropriate dispensing devices we can optimize the manufacturing and handling time. In this way we will reduce production costs.

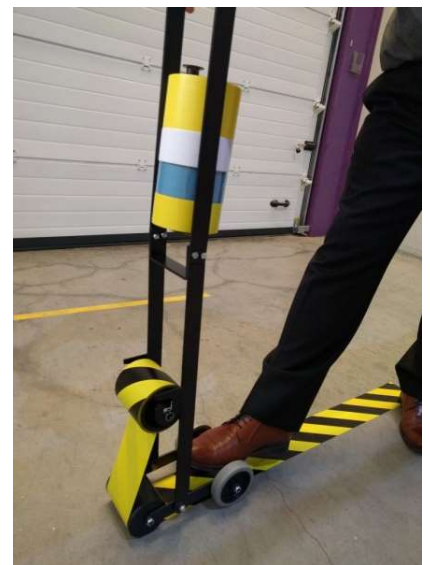

We put at your disposal a complete range of adhesive tape dispensers; both manual and automatic, valid for using different types of adhesive tapes; single-sided or double-sided.

Semi-Automatic Dispenser Apparatus
of Adhesive Tapes

Floor Tape Applicator Cart

3M[™] Scotch-Weld[™] EPX[™] Manual Applicator

For Adhesive Strapping Tapes

Manual Benchtop Tape Dispensers

Packing Tape Dispensers

Adhesive handles

The adhesive handles for "handylift" groups are the simplest solution for an easy transport of multi-packs of mineral water, soft drinks, dairy bricks, juices, canning containers, etc.

Our adhesive handles are a convenient transport solution for the end customer, while maintaining efficiency in production.

Preformed handles, with adhesive areas and white paper area

With Double Protective

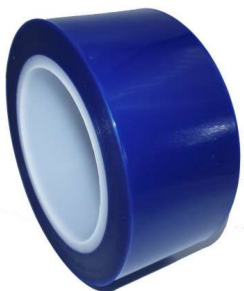

VOID Labels and Seals

Transfer Adhesive Seal "OPENED"

Security seal to seal contents and expose improper access to them. Avoid fraud and theft. Once detached, the word OPENED appears on the surface where it is stuck, thus recording that the product has been tampered with.

Also with the possibility of customization

Total Transfer Adhesive Labels

Adhesive Labels No Transfer "VOID - OPEN"

Labels With Adhesive Transfer "VOID - OPEN", Yellow, Special Takeaway Food

GLUE POINTS Adhesive Drops

Double-sided "transfer" adhesive drops, also known as gluedots, available in 3 types of adhesive: repositionable, normal and extra strong.

Adhesive drops allow to fix different types of objects in a way, simple, fast and economical

These adhesive tears are ideal to use in different tasks such as:

- Sending circulars that include small objects: samples, business cards, membership cards, discount vouchers.
- Sending small samples in magazines, books and other publications.
- Quick and secure product bonding (even the smallest items)
- Assembling objects for packaging.

Adhesive Blister Hangers HANG TABS

Adhesive hangers that quickly stick to the surface of a product. These hooks are great for hanging wrapped packages and for in-store repair of damaged packages.

The adhesive blister hanger is perfect for stores, as it improves the vision of the products, thus increasing sales, and at the same time reducing the space used for their display at the point of sale.

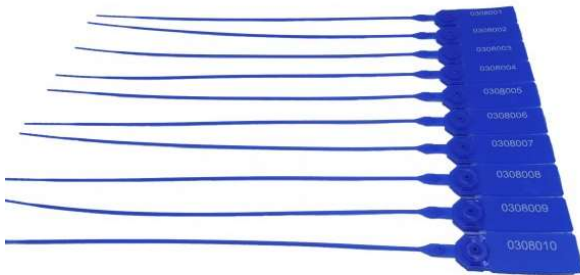

Available in various models and presentations, depending on the weight of the product to be hung (including an extra-strong model with resistance up to 1.5 kg).

In particular, our "hook" model is suitable for all types of displays, especially those that have different products hanging on the same shelf. Also available in "reversible" format

BigBag and Safety Flanges

Our security ties each have a serial number, which makes them useful for a multitude of applications in which we want to preserve the security of the content.

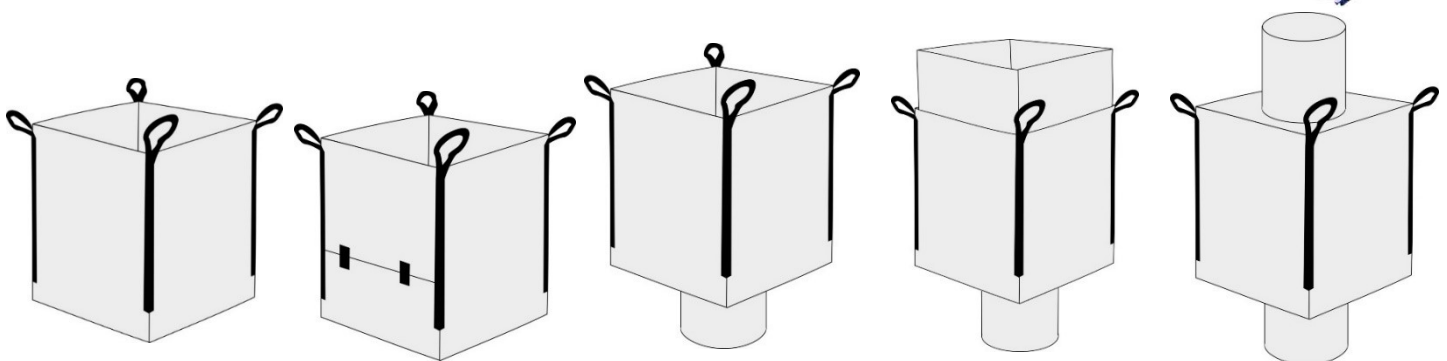

Suggested applications: security bags, transport of valuables, trucks, tanks, refrigerators, postal mail, containers, lockers, fire extinguishers, counters, valves, motors, boxes, catering, airlines, chemical industry, banking, counters, quality control, numbering of hams, etc.

BIG BAG bags for packaging and transporting aggregates, rubble, grass, cereals, flour and all kinds of bulk materials.

We have different measures and possibilities such as loading / unloading mouths, closing sleeves, antistatic and approved for the transport of dangerous goods.

They can be personalized in up to 4 inks with your logo.

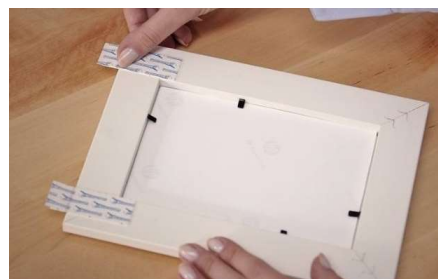

TESA Specialties

Cover Plastic 56652
Extra Strong Transparent

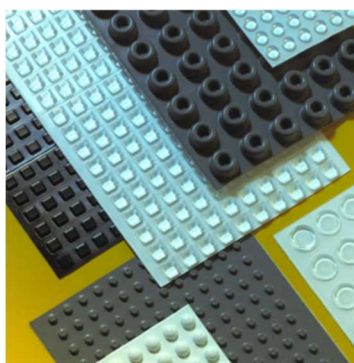

Adhesive Strips Powerstrips 77761
- Box of 6 Strips of 80mm

Polyurethane Adhesive Bumpers

Polyurethane adhesive bumpers (PUR) are mainly used as supports on bases, bumpers and spacers on objects. They absorb vibrations and do not transmit noise.

There is a wide range of measurements and in different shapes: hemispherical, cylindrical, flat and prisms.

Suitable for:

- Furniture production.
- Decorative objects
- Electronics and medical devices.
- Glass Industry.
- Home appliances.
- Applications in the automotive industry.

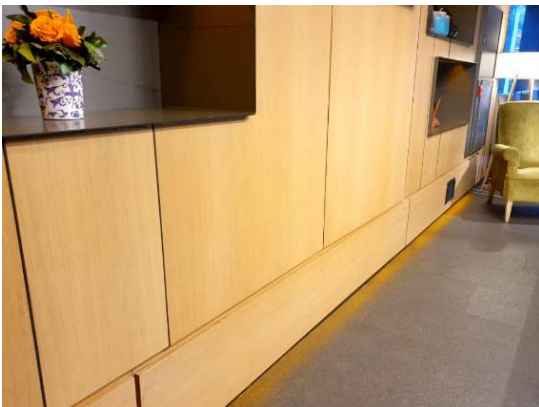

Specialties

Decontamination adhesive mats for clean rooms

Lamination of different materials with adhesive.

We can laminate, adhesive, and adapt almost any material to suit each client's needs.

For the transportation, railway, naval, furniture, appliance, and construction sectors, among others.

Perfect for laminating floor and pavement coverings and decorative panels for elevators, trains, buses, boats, caravans, etc.

You can choose the materials to use: fixed or removable adhesives, films, foams, fabrics, paper, metal foils, etc.

3M Industrial Absorbent Range.

In the format of Minicords /
Cords, Pads, Carpets, Rolls,
Sheets and conformable Band.

3M Chemical Absorbents,
for hazardous liquid spills.
Also available Emergency Spill Kits

3M Maintenance Absorbents,
to absorb oils and other industrial fluids
non-aggressive in a clean, safe and effective way.

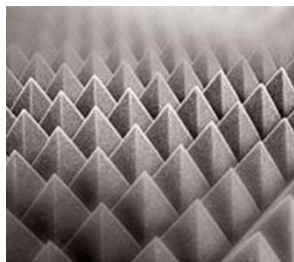

3M Hydrocarbon Absorbents.
They absorb liquids based on hydrocarbons (olefins)
and repel water-based products (hydrophobic).

Adhesive Foam Tapes and Adhesive Weatherstripping

We have various types of foam adhesive tapes in the sizes that best suit your needs.

When choosing which type of adhesive weatherstrip is the most appropriate, we must take into account:

- Application of the foam gasket
- Acoustic insulation, thermal insulation, joint sealing, protection against impacts, vibrations.
- Conditions in which the product will be Interior, exterior, exposed to humidity, cold, impacts
- Optimum measurements of the adhesive tape Thickness and width and linear meters. (mm x mm x m)
- Density Different degrees of hardness. (Kg / m2).
- Format Coil, roll, profile, tubular or custom die-cut piece.

Foam Adhesive Tape
EPDM Neoprene Rubber

Adhesive tape
Polyethylene foam

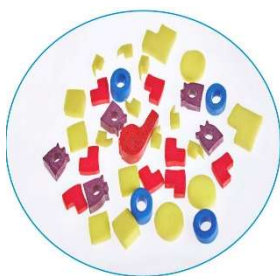

Adhesive tape
Ceramic Foam

Adhesive tape
Silicone Weatherstrip

Wide variety of silicone film, as well as extruded silicone foam profiles, sections, beads and tubes

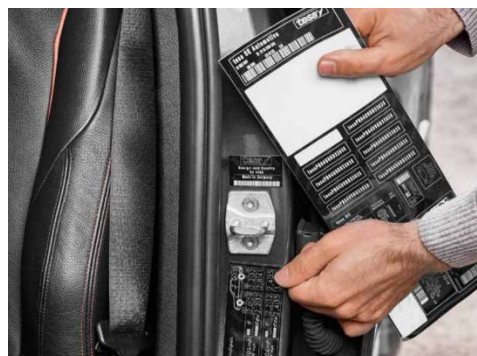

Laser Engraved Labels

Laser labels combine the security of metal plates with the flexibility of thermo-printing in a product, thus allowing to mark safely tailored to the design of each product.

The die-cutting of the label is carried out together with that of the engraving, since it is the same laser that cuts the label according to its design.

They are ideal for permanently marking your products, allowing the individualization of each label and can be printed with series of numbers or graphics, ensuring that it will remain unchanged given its resistance to both chemical and abrasion.

The characteristics of the material make any manipulation of the label evident, avoiding fraudulent use.

ADVANTAGES OF LASER LABELS

- Indelible. They cannot be erased. Resistance to UV rays and chemical agents.
- Inviolable. They cannot be faked. If you try to peel it off it crumbles.
- Self-extinguishing. Resistance up to 300°C.
- Numerable. Allows you to make serial numbers and barcodes.

TAPE WITH REPOSITIONABLE CLOSURE / VELCRO[®] / DUAL LOCK

Polyamide tape closures are made up of two well differentiated parts: female part (loop) and male part (hook)

The woven hook tape (male) consists of small hooks that grip the part formed by soft loops (female).

Characteristics:

- A high security closure is produced and ready to be used on many occasions.
- Very easy one-touch closure.
- Adjustable and repositionable. We can rectify the joints at any time.
- It is reusable. It allows to open / close for several hundred times.
- Available in various sizes and colors.

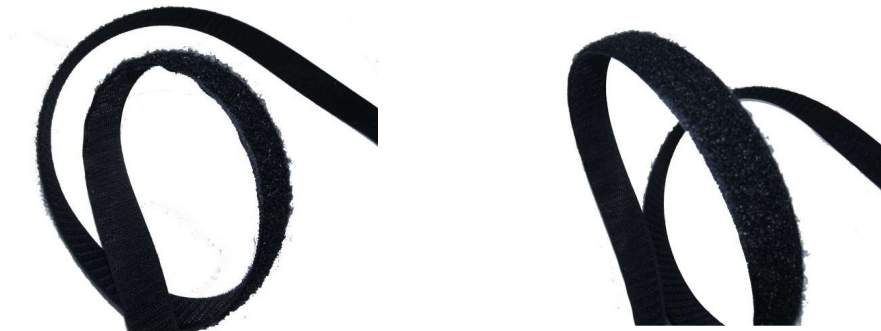

Adhesive Repositionable Closure

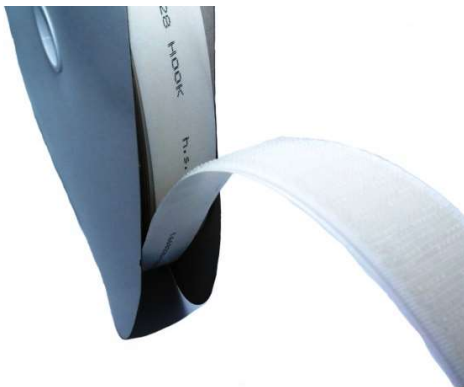

Repositionable Closure For Sewing

Repositionable Double Hook & Loop Closure

Repositionable Thermo-Adhesive Closure

HF (high frequency) weldable Velcro tape is used to bond specific fabrics such as vinyl or other plastic applications that require a secure hold.

This type of Velcro tape has a special adhesive film and must therefore be bonded to the application using an ultrasonic welding machine.

- Heat-welding on truck tarps and event tents.
- Heat-welding on mobile panels for thermal insulation of refrigerated trucks.
- Fastening awnings and PVC tarps.
- Professional use on fashion and technical sportswear.

Die Cut Repositionable Closures

Male and female Velcro punched into squares and circles of various diameters (between 10 and 45 mm).

"VEL-OW64114" Black - 25m x 13mm Roll

LogiStrap® reusable Velcro strap.

Allows you to insure your merchandise on a pallet, container box or other type of packaging, thus reducing costs in the supply chain; represents a significant reduction in packaging, recycling and maintenance in their expeditions.

Base material: polyamide
Width: 50mm
Lengths: 4, 5, 6, 7 meters

Velcro Straps for High Temperatures

- FR Fire Retardant, up to 180°C
- Hi-Temp High Temperatures, up to 260°C
- Hi-Garde Extreme Temperatures, up to 800°C

Velcro Protective Tree Sleeves

Protector of seedlings and trees, very easy to install.

Protects the trunk from rodents, snails, herbicides and frost.

Allows easy and quick access to the trunk for pruning and production optimization.

Customizable at different heights.

Resistant to usual atmospheric conditions.

Sustainable with the environment, for being reusable and 100% recyclable.

- Easy to install
- Protects against rodents
- Herbicides protection
- Frost protection
- Resistant to outdoor conditions
- Recyclable and reusable
